Re: 167-11974-00053  
First Administrative Amendment to  
FESOP 167-5644-00053

Dear Mr. Lowe:

Lowe's Blacktop & Excavating was issued a permit on December 13, 1996 for the operation of a stationary hot batch-mix asphalt plant, with a maximum capacity of twenty (20) tons per hour. A letter requesting an addition of a pneumatic dust return system was received on February 8, 2000. Pursuant to the provisions of 326 IAC 2-8-10 the permit is hereby administratively amended as follows:

The addition of a pneumatic dust return system that will return material (dust) back into the asphalt mixing process from the existing cyclone collector. The pneumatic system includes an air lock and blower, and a small cyclone. The fugitive emissions will be reduced as the material is collected and periodically sent to waste via a payload bucket.

A.3 Insignificant Activities

This stationary source also includes the following insignificant activities, as defined in 326 IAC 2-7-1(20):

**7) Pneumatic dust return system, consisting of an air lock and blower, and a small cyclone.**

All other conditions of the permit shall remain unchanged and in effect. Please attach a copy of this amendment and the following revised permit pages to the front of the original permit.

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5. If you have any questions on this matter, please contact Mr. Darren Woodward, at (812) 462-3433, extension 15.

Sincerely,

George M. Needham  
Director  
Vigo County Air Pollution Control

Terre Haute, Indiana 47805**

(Herein known as the Permittee) is hereby authorized to operate subject to the conditions contained herein, the facilities listed in Section A (Source Summary) of this permit.

This permit is issued in accordance with 326 IAC 2 and 40 CFR Part 70 and contains the conditions and provisions specified in 326 IAC 2-8 and 40 CFR Part 70.6 as required by 42 U.S.C. 7401, et. seq. (Clean Air Act as amended by the 1990 Clean Air Act Amendments) and IC 13-1-1-4 and IC 13-7-10.

Operation Permit No.: F167-5644-00053	
Issued by: George M. Needham, Director Vigo County Air Pollution Control	Issuance Date: December 13, 1996
First Administrative Amendment 167-11974-00053	Page(s) affected: 2
Issued by: George M. Needham, Director Vigo County Air Pollution Control	Issuance Date: March 15, 2000

A.3 Insignificant Activities

This stationary source also includes the following insignificant activities, as defined in 326 IAC 2-7-1(20):

- 1) Two (2) storage tanks (T-2, diesel fuel; and T-4, #2 fuel oil) with capacities less than or equal to 1,000 gallons and annual throughput less than 12,000 gallons.
- 2) Application of oils, greases, lubricants or other nonvolatile materials applied as temporary protective coatings.
- 3) Blow down for any of the following: sight glass; boiler; compressor; pumps; and cooling tower.
- 4) Rotary power supply - less than 110 HP.
- 5) Emergency gasoline generator - less than 110 HP.
- 6) unpaved roads (UR-1), maximum mileage of 578.0 miles per year with fugitive emissions.
- 7) Pneumatic dust return system, consisting of an air lock and blower, and a small cyclone.

A.4 FESOP Applicability [326 IAC 2-8-2]

This stationary source, otherwise required to have a Part 70 permit as described in 326 IAC 2-7-2(a), has applied to Vigo County Air Pollution Control (VCAPC) and Indiana Department of Environmental Management (IDEM), Office of Air Management (OAM) for a Federally Enforceable State Operating Permit (FESOP).
